Professional Summary

Aspiring **Data Engineer** with hands-on experience in **Azure Data Factory, PySpark, SQL, Python, Power BI, and Excel**. Skilled in building data pipelines, transforming and cleaning 50,000+ records, integrating multiple data sources, and automating data workflows to improve reporting efficiency. Strong foundation in **ETL/ELT, data transformation, and analytics**, with a focus on building reliable data solutions and delivering actionable insights.

Work Experience

Data Analyst Intern, Innovexis - Processed 50,000+ records using SQL and Python (Pandas, NumPy), improving reporting efficiency by 20%. - Cleaned, transformed, and analyzed data to identify key trends and insights. - Built interactive Power BI dashboards, reducing manual reporting by 10 hours/week.	11/2025 – 01/2026 Bengaluru, Karnataka
Data Engineer Intern, J2D Technologies Pvt. Ltd. - Built ETL pipelines in Azure Data Factory to collect and process data from multiple sources. - Cleaned and transformed large datasets using PySpark on Databricks. - Worked on an end-to-end data pipeline project while learning Microsoft Azure cloud fundamentals.	06/2026 – 08/2026 Bengaluru, Karnataka
Data Collection Executive, Instawork - Recorded 30+ hours of high-quality video data for AI and robotics model training, following strict data standards. - Maintained proper framing, lighting, and workspace quality to ensure consistent, training-ready datasets.	12/2025 Remote

Education

Master of Computer Science & Information Technology (M.Sc. CS & IT), JAIN (Deemed-to-be University)	2025 – Present Bengaluru
Bachelor of Science in Information Technology (B.Sc. IT), Uka Tarsadia University CGPA: 7.59	2022 – 2025 Surat

Technical Skills

Languages Python, SQL, Java, C++, JavaScript, C#,HTML, CSS, PHP, Bootstrap,R	Data Engineering PySpark, Azure Data Factory (ADF), Databricks, ETL Pipelines, Microsoft Azure (Cloud)
Visualization Power BI, Matplotlib, Seaborn	Databases SQL Server Management Studio, MySQL, Oracle, SQLite
Libraries Pandas, NumPy, Scikit-learn	Tools Excel, Git, VS Code, Android Studio

Projects

Azure Data Engineering & BI Analytics 
- Designed a cloud-native retail analytics pipeline using Azure Data Factory, Databricks, PySpark, Synapse Analytics, and Power BI, implementing Bronze–Silver–Gold Medallion Architecture with five interactive dashboards. - Tools: Azure Data Factory, ADLS Gen2, Databricks, PySpark, Synapse Analytics, Power BI, DAX, GitHub API

Bird Species Observation Analysis [↗](#)

- Analyzed bird observation data using SQL and Python to identify species trends and observation patterns, and developed interactive Power BI dashboards and a Streamlit application for data visualization.
- Tools: Python, Pandas, Matplotlib, Seaborn, Jupyter Notebook

Ola Ride Data Analysis [↗](#)

- Cleaned and analyzed 10,000+ ride records to find demand patterns by time and location. Built Power BI dashboards to show peak hours and revenue trends.
- Tools: Python, Pandas, Power BI, SQL

Retail Sales & Inventory Intelligence System [↗](#)

- Developed a business intelligence solution using Excel, SQL Server, and Power BI to analyze retail sales, inventory performance, customer insights, and staff productivity through interactive dashboards.
- Tools: Python, Excel, SQL Server, Power BI.

Event Management System

- Built a full-stack web platform where vendors can register services and customers can book them for events, backed by a well-structured MySQL database.
- Tools: PHP, MySQL, AJAX, HTML, CSS, JavaScript, Bootstrap

Certifications

Data Analytics & Data Engineer [↗](#)

- AI Fundamentals, Machine Learning, Python Programming, Advanced DBMS, Blockchain, Java, Computer Networks, Research Publication
- BCG X Data Science Job Simulation — Forage (April 2026)
